

Ming Hung Cutting Tool Industrial Co., Ltd.

**Tungsten carbide cutters for DIY woodworking machines,
papermaking machines, and food processing machines**

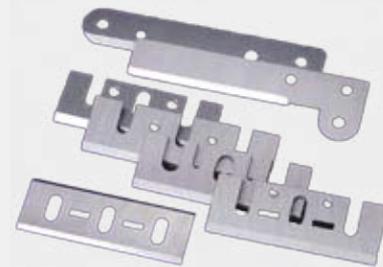

Founded in 1987, Ming Hung Cutting Tool Industrial Co., Ltd. makes all kinds of tungsten carbide cutters, including slitting and trimming cutters, slicing cutters, cutters for electrical tools, wood shavers and planers, and cutters for crushers. The cutters are suitable for DIY-type woodworking machines, papermaking machines, food-processing machines, plastics-processing machines, and farming machines.

Drawing on its abundant store of know-how and experience, plus stringent quality management, the company provides a diverse range of high-quality cutters. The products are reasonably priced; but there is nothing cheap about the company's manufacturing service, which is tailored to customer specifications and designs. Before starting each contract production run, R&D specialists thoroughly study the customer's materials requirement to locate the ideal materials to be used.

All Ming Hung products are made in a Taiwan factory and shipped mostly to Japan, the Middle East, and India.

The company has an R&D team of 10-plus specialists with an average of 15 years of experience in the field. Each year the team comes up with more than 20 designs for contract buyers, and the firm's sales unit satisfies customers with a nimble response and enthusiastic attitude.

Customers are assured of an average 30 days of lead time, and are guaranteed of the lowest prices available.
