

Sheng Yu Machinery Co., Ltd.

Metalworking machines as cutoff saws, borers, grinders, sanders, polishers, hydraulic pressing machines, as well as carpentry and industrial woodworking machines

Sheng Yu Machinery Co., Ltd., formerly Sheng Feng Woodworking Machinery Co., Ltd. and a woodworking machine manufacturer, has in recent years diversified into metalworking machines for 2D processing of metals to cope with ever changing market demand, backed by its years of experience in making, selling woodworking machines.

The company supplies metalworking machines including cutoff saws for aluminum sheets (including cooling fins) and extrusions, machines for metal surface processing including de-burring and hairline finishing, as well as manual and automatic units for dry and wet grinding of aluminum, brass, iron, stainless steel, magnesium aluminum alloy, and much more, for 3C, bathroom fitting, automotive, sports equipment, bicycle, and gardening tool applications.

Staying conscientious and aggressive to achieve sustainability, Sheng Yu is committed to providing customers with optimal quality and service. It continues to enhance the quality of 2D metal processing, also steadily investing energy and time in development of models for asymmetrical metal processing to better meet demands locally and overseas.

Sheng Yu manufactures, sells under its own Worldmax brand, also filling OEM, ODM and custom orders. The company also consistently focuses on product improvement, development, and innovation to provide the most advanced, complete range of machinery, equipment among counterparts that help customers lower production cost, maintain processing quality, and enhance production capacity and efficiency.
