

Kyon Yo Industries Co.

Machine tool parts, gauge/meter parts, electronic parts, automotive parts and more

Kyon Yo Industries Co. was founded in 1989 to make components for tabletop lathes. Eighteen years later, the company expanded into manufacturing of components for computer numerical control (CNC) horizontal machine tools to diversify product line and keep up with customer demands.

Its product line now covers precision parts for CNC/NC milling and lathing machines, gauge/meter parts, electronic parts, automotive and motorcycle parts, mechanical parts, and specialty metal valves.

To ensure high quality, the company makes products out of high-end stainless steel, cast iron, steel, aluminum alloy, and magnesium alloy, which are examined with 2D and 3D gauges.

Certified ISO9001: 2008 for keeping safe work settings, the company is noted for continual effort to improve quality and service.

It has set built solid technical strength backed by precision manufacturing equipment, stringent quality inspection, systematic management, and well trained R&D specialists.

The company's other advantages include full inspection of every part before shipping and consolidates orders for shipment in one container as much as practicable to minimize customers' cost.

Placing strong emphasis on research and development, quality, service and innovation, the company has been able to develop innovative products in tune with customers' tailored requirements. (KL)
