

Liege International Co., Ltd

Professional manufacturer of rubber parts for engines

Established in 1992, Liege International Co., Ltd, a Taiwan-based company specializing in making rubber parts and suspension links, has been committed to satisfying its domestic and overseas customers with high quality and professional services.

To meet ever-changing market demands, Liege has been continuously putting efforts on the R&D of new products. Hydraulic Engine Mounting, for instance, is the firm's latest product, which features a buffer against swing amplitude occurring during operation.

Liege's major products, including engine mountings, shock absorber mountings, bushings and boots, all boast the finest quality that is comparable with that of OE (original equipment)-caliber models and measures up to the international standard.

Upholding the finest quality, Liege has continuously sharpened its manufacturing skills, and conducted quality controls in line with the strictest standards, hence having passed ISO-TUV SUD ISO-9001:2015 certification.

A high-profile company that insistently kicks off new R&D projects every season, Liege capably fills OEM and OBM orders and welcomes various kinds of cooperation with customers from all corners of the world.
